About us

Founded in 1958, Tiskarna Novo mesto has grown into one of Slovenia's leading printing companies.

Today, with a team of 170 employees, the company is a trusted and respected partner, specializing in production of folding boxes and leaflets for domestic and international markets.

Tiskarna Novo mesto is a member of Perspektiva group.

Company values

Quality • Innovation • Reliability • Flexibility • Responsibility

We combine technological excellence with a commitment to our people, our customers, and the environment, creating packaging solutions that meet the highest standards of the pharmaceutical industry.

Our mission

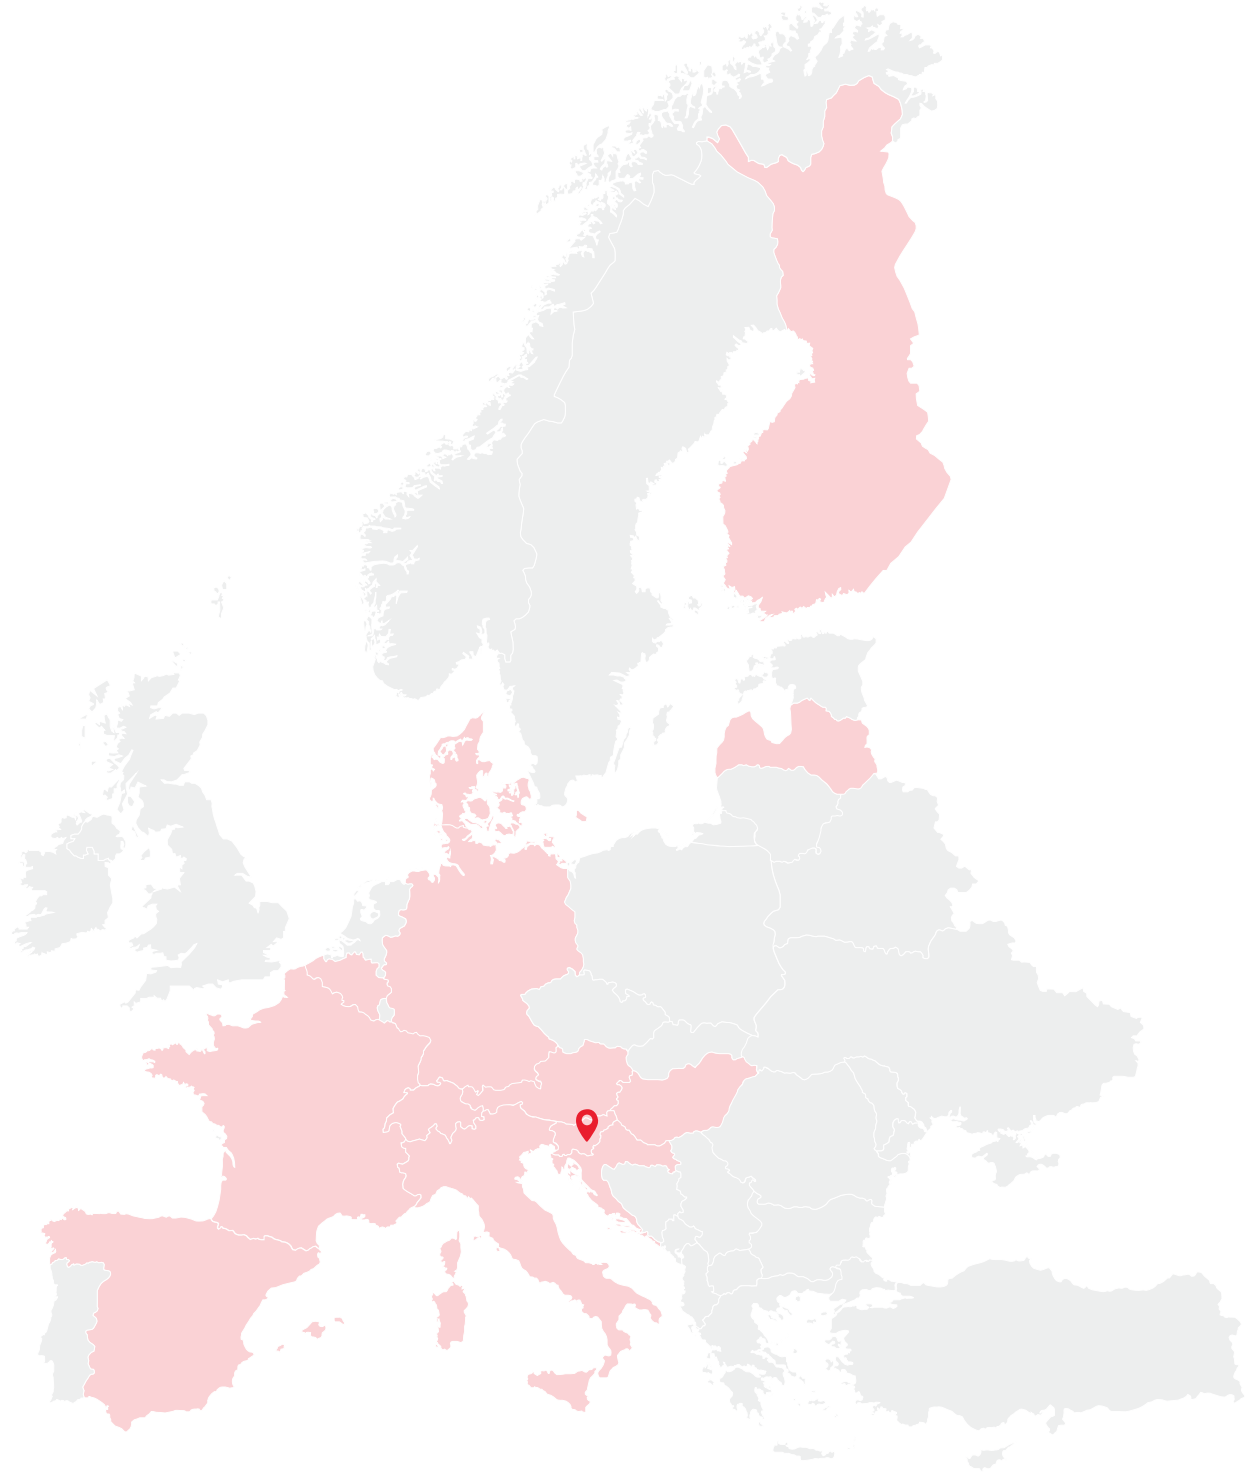

Up to 95% of our products are sold to pharmaceutical companies, where precision, reliability and consistency are essential. Our mission is to combine advanced technology, rigorous quality control and skilled people to deliver packaging solutions our customers can rely on.

- France
- Switzerland
- Belgium
- Denmark
- Spain
- Finland
- Latvia

Investments

Our success is reinvested where it matters most.

We reinvest approximately **5%** of our annual sales revenue, around **€1.5 million each year**, into our company and our people. These investments enable us to maintain modern production facilities equipped with advanced technologies from leading manufacturers such as Heidelberg, Bobst and Kongsberg.

04

Future growth investment strategy

We aim for 10% organic growth.

A snapshot of our production in 2025.

 **317** million
FOLDING BOXES

 **190** million
LEAFLETS

 Sales revenue:
€19,6 million

Projected growth in 2026: **+5%**

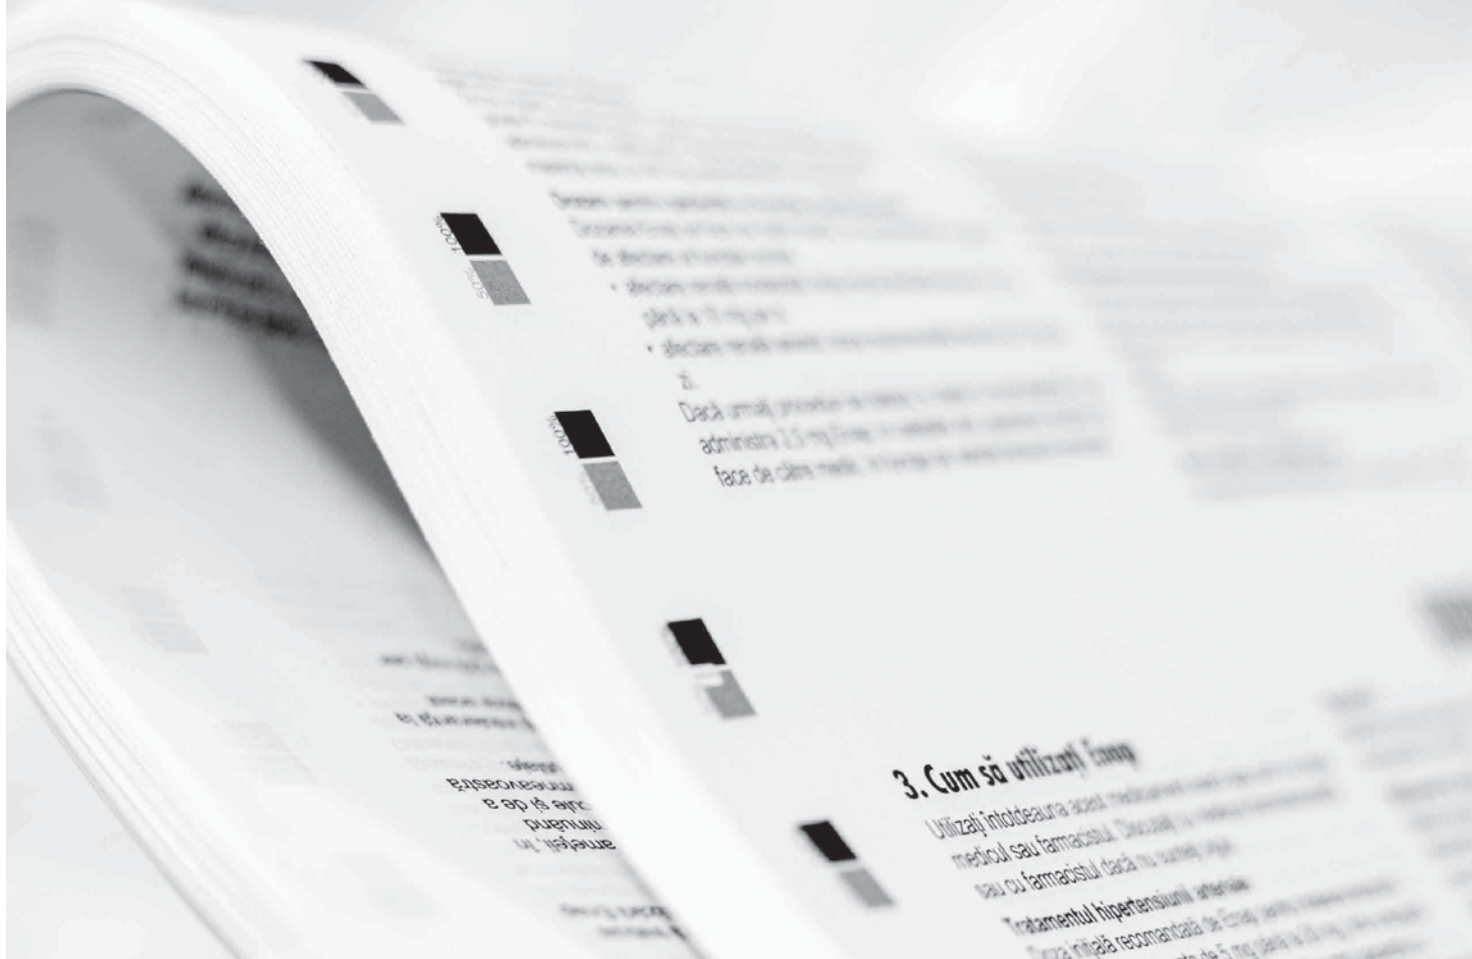

05

FOLDING BOXES

Packaging designed to stand out.

We produce folding boxes on paperboards up to 450 g/m², enhanced with a variety of special finishes and effects.

LEAFLETS

Whether standard or highly customized, we manufacture leaflets in a wide range of formats, folds, and finishing options - from simple inserts to complex, tailor-made solutions - using paper weights from 37 g/m² onwards.

Custom made solutions

We work closely with our customers to develop tailored solutions beyond standard products. Whether it involves specialized leaflets, folded inserts, PAC bundles, or other custom applications, we provide the expertise and support needed to bring each project to life.

Technology we use

From concept to final product, every project follows a precise and controlled process powered by advanced technology.

06

01 — Computer preparation

The foundation of every project.

Advanced prepress solutions ensure accurate file preparation, optimized production, and consistent quality from the very beginning.

02 – Offset print

Controlled precision at every stage.

Modern offset technology combined with color management systems delivers stable and accurate print results.

06

03 – Cutting and folding

Precision shaped to your requirements.

Flexible finishing capabilities allow us to create a wide range of leaflet formats and folding solutions.

04 – Die-cutting and gluing

Shaping the final form.

Advanced die-cutting and gluing technologies transform printed sheets into finished folding boxes, supporting diverse packaging formats and configurations.

06

05 — Special applications

Advanced finishing for custom solutions.

Our finishing technologies enable complex shapes, special applications and tailored product solutions.

Finishing options:

Embossing • Braille • Water-based varnishes • Soft-touch & sand-touch finishes • UV varnish • Hot foil stamping • Lamination

Quality control

Quality is built into every step of our process.

Following GMP principles and ISO 9001 standards, our quality control team ensures that every product meets strict pharmaceutical requirements—from incoming materials to final approval.

07

01 — Incoming material inspection

All materials are inspected before production to ensure compliance with our quality standards.

02 — In-process quality control

Quality checks are performed throughout production, including visual inspections and advanced electronic controls using Global Vision and Pixel Proof – Dotscan for precise print and Braille verification.

03 — Final product inspection

Before shipment, every order is inspected and approved. A quality certificate confirms compliance with customer requirements.

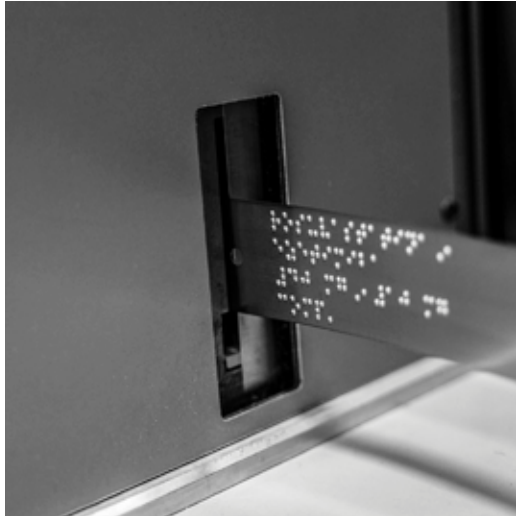

Our quality culture is supported by continuous employee training and ongoing improvements in technology, processes, and customer requirements.

Braille quality inspection

Accuracy down to the smallest detail.

Our advanced Braille inspection system verifies every Braille dot, ensuring correct positioning, height and compliance with pharmaceutical requirements.

Sustainability

Investing in a more sustainable way of production.

Through continuous modernization, renewable energy use, and responsible resource management, we are reducing our environmental impact while improving production efficiency.

Key initiatives:

- 320 kW solar power plant
- FSC® certified production (SA-COC-008417)
- Modern technologies and optimized processes
- ISO 14001 certification planned

2030 targets:

- 26–50% reduction in greenhouse gas emissions
- 50% electricity self-sufficiency
- 30% reduction in clear water consumption

08

Certifications

Our processes are supported by internationally recognised certifications for quality, safety, and responsible production.

- **FSC®**
Responsible sourcing of materials.
- **FSSC 22000**
Food safety management and control.
- **ISO 9001**
Quality management and continuous improvement.
